

DACITY COIN

\$DACITY

Welcome to the City

A Community-Driven Meme Token on Ethereum
Inspired by the Spirit of Vice City

Whitepaper — Version 1.0
October 2026

Abstract

Dacity Coin (\$DACITY) is a community-driven meme cryptocurrency launched on the Ethereum blockchain. Inspired by the fictional "Dacity Coin" / AudaCity brand featured in the GTA VI trailer, \$DACITY captures the energy of a vibrant tropical city — palm-lined streets, sunset beaches, shared adventures, and bold community spirit. Built as a fair-launch ERC-20 token with a fixed supply of 1 billion tokens, \$DACITY has no team allocation, no taxes, and focuses purely on culture, community engagement, and the excitement of decentralized meme culture. This whitepaper outlines the project's vision, tokenomics, and roadmap.

1. Introduction

In October 2026, the official GTA VI launch trailer briefly featured a plane carrying the words "DacityCoin AudaCity." This fleeting moment sparked immediate interest across crypto communities, leading to the creation of multiple community tokens. \$DACITY on Ethereum represents one such community effort — a fan-made token celebrating the bold, larger-than-life energy of Vice City.

Important Disclaimer: \$DACITY is a fan-made community token. It is not affiliated with, endorsed by, or connected to Rockstar Games, Take-Two Interactive, or any official GTA franchise. All trademarks belong to their respective owners.

2. Vision & Culture

Dacity Coin captures the spirit of a tropical city where sunny beaches, vibrant streets, and shared adventures bring people together. Inspired by palm-lined coastlines, sunset skies, and the excitement of beachside energy, \$DACITY celebrates a community that knows how to enjoy the moment.

Every holder becomes part of the city. The project emphasizes:

- **Community First** — Made by fans, for the fans
- **Cultural Energy** — Vice City vibes, boldness, and audacity
- **Transparency** — Open-source contract, no hidden functions
- **Growth Through Culture** — Organic community building around shared memes and narratives

3. Token Specifications

Parameter	Details
Token Name	Dacity Coin
Symbol	DACITY
Blockchain	Ethereum (ERC-20)
Contract Address	0x54ce4b27caabba24926865f035d432dbde2901f7
Total Supply	1,000,000,000 (1 Billion)

Decimals	18
Taxes	0% Buy / 0% Sell
Contract Type	Standard ERC-20 (Verified, Open Source)
Mint Authority	Renounced / Fixed Supply

4. Tokenomics

As a pure community meme token, \$DACITY follows a fair-launch model with the entire supply distributed through the liquidity pool and open market. There is no pre-mine for a development team, no vesting schedules, and no hidden allocations.

Key Principles:

- 100% of supply available to the community via DEX trading
- Liquidity provided on Uniswap V3
- Zero transaction taxes to maximize holder value
- Contract ownership renounced to ensure immutability
- Fixed supply — no inflationary minting

5. Roadmap

Phase 1 — Launch

Token deployment on Ethereum, Uniswap V3 liquidity pool creation, community formation, and initial marketing through social channels.

Phase 2 — Community Growth

Reach 1,000+ holders. Expand social presence (X/Twitter, Telegram). Community events, meme contests, and organic viral campaigns centered around the Vice City / GTA VI narrative.

Phase 3 — Expansion

Centralized exchange listings (including Gate.io), partnerships with other community projects, potential holder reward mechanisms, and growth into the largest GTA-inspired fan token ecosystem.

6. Utility & Future Vision

While primarily a cultural and meme token, the community has expressed interest in exploring holder reward mechanisms. Any future utility (such as tokenized reward distributions) would be developed transparently and governed by community consensus. The core focus remains on building a strong, engaged community around the Dacity / Vice City aesthetic.

7. Security & Transparency

- Contract verified on Etherscan
- Standard OpenZeppelin ERC-20 implementation
- No honeypot, no blacklist, no proxy
- Zero taxes confirmed on-chain
- Community encouraged to verify the contract independently at:
